Civic Governance is a new approach to organizing to facilitate change for the common good, creating effective and stable organizations.

The purpose of Civic Organizing is to organize people to the obligation of being an active citizen; providing the opportunity for them to impact decision making in their role and in day to day work; learning what is good and growing in that knowledge.

- To broaden governing responsibility to include those impacted but not replacing existing governing responsibilities of board members and supervisors. We need to work together; no one group can alone solve our environmental concerns.
- Organizing comes with the obligation of active citizenship.
- Active citizenship is developed in the way institutions and projects are governed in the process of carrying out their mission/purpose/achieving goals.
