6.  5:35-5:45 General Discussion / Public Input

Hoppe requested to establish parameters on spending guidelines on projects. To be continued in discussion. Often there is a distinction between restoration practices, meant to clean up an existing pollution concern and protections practices, meant to protect from pollution an already clean water resource. Restoration and protection practice projects often cannot be compared to one another for their pollution reduction numbers. Pomije explained that often grants will specify certain practices for implementation and certain focus area locations in the county to focus our efforts with a water quality goal in mind.

Hoppe requested to be added to the East Central Landscaping Committee (organized by Lindberg Ekola) meetings list of attendees. He would like to attend the quarterly meetings. Kelzenberg would also like to attend the East Central Landscaping Committee meetings, as needed to ensure representation. Pomije will request that Hoppe and Kelzenberg be added to the list of invitees.

**Civic Governance** is a new approach to organizing to facilitate change for the common good, creating effective and stable organizations.

The **purpose** of Civic Organizing is to organize people to the obligation of being an active citizen; providing the opportunity for them to impact decision making in their role and in day to day work; learning what is good and growing in that knowledge.

- To broaden governing responsibility to include those impacted but **not replacing existing governing** responsibilities of board members and supervisors. We need to work together; no one group can alone solve our environmental concerns.
- Organizing comes with the obligation of active citizenship.
- **Active citizenship** is developed in the way institutions and projects are governed in the process of carrying out their mission/purpose/achieving goals.
